

NEW FURNACES IMPROVE PRECIOUS METALS MELTING SERVICES

THE HEAT IS ON...

THE LABORATORY AT THE BIRMINGHAM ASSAY OFFICE

FOLLOWING FURTHER
INVESTMENT IN INDUCTION
FURNACES PRECIOUS METALS
MELTING IS EVEN FASTER
AND MORE EFFICIENT

- Melt and assay of scrap containing gold, silver, platinum and palladium
- Dip sampling from the core of the molten metal provides highly accurate results. All remaining dip samples together with any residues are returned to the customer.
- The Birmingham Assay Office reports are widely accepted by all the major refiners and bullion dealers – enabling you to sell for the best price. Certificate numbers are stamped on the bars.

- Same day melt and assay service is available; a premium will be charged
- A trusted independent service, The Birmingham Assay Office does not purchase precious metals and has no vested interest in the results.
